The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if

the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 contains the recitation "optionally" and it is unclear as to whether the optional component is intended to be included or excluded from the composition. An amendment to the claim canceling this term would overcome the rejection.

O/W is utilized throughout the claims and it is unclear as to what specific this stands for. An amendment to the claims replacing O/W with –oil-in-water- would overcome the rejection. Claims 3, 5, 8, 10 and 12 contain an incomplete Markush grouping. An amendment to the claims substituting –is selected from the group consisting of- would overcome the rejection. In claim 5 "and/or" is confusing because it is unclear as to whether the component is intended to be utilized in the claimed product or not. An amendment to the claim clarifying this issue would overcome the rejection.

Claim 17 contains a ratio but it is unclear what ingredients for a part of the ratio. An amendment to the claims clarifying this issue would overcome the rejection.

Claims 18 and 19 utilize the passive voice. An amendment to the claims converting them from passive to active would overcome the rejection.

Claim 20 provides for the use of claim 1, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 1 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3-6,9, 14, 19 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell (5,698,254).

Campbell discloses a coconut cream substitute that contains fat, protein, emulsifier, sweetener, thickener and flavor. The sweeteners are shown at column 3, lines 16-25 while the thickeners are shown at column 3, lines 7-24 to be gums. The ratio of oil to water appears to fall within the range that is set forth at column 5.

Claims 1-5, 7, 9, 10, 15, and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cain (5,659,000).

Cain discloses a low fat emulsion process for a water continuous fat emulsion containing water, fat, acidity regulator, thickener, bulking agent, emulsifier, sweetener, flavor and humectant. The composition is shown at example 1 while the thickeners shown at column 3, lines 19-29 are hydrocolloids.

Claims 1, 3-5, 8-12, 14-16, 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rule (4,341,811).

Rule discloses a fluid non-dairy creamer. That contains fat emulsifier, water sweetener, flavor and color (example 1) the use of hydrocolloids is also contemplated for use at column 6, lines 16-36.

Claims 13 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
